

Concrete and Asphalt Cutting Machine

This concrete cutting machine is designed for efficient and precise cutting of concrete and asphalt surfaces. It features a powerful engine, a durable cutting blade, and adjustable cutting depth for versatile applications.

Overview

Professional Concrete and Asphalt Cutting Solution

This self-propelled cutting machine is engineered for precision on sidewalks, driveways, and small-scale service repairs. It features a patented vibration-reducing mounting system and the IntelliSeal bladeshaft, which provides over 250 hours of maintenance-free operation. Designed for durability and performance, it includes a locking differential drive system to ensure consistent cutting on uneven surfaces.

Performance Features

Maintenance-Free Intervals

250 hrs

IntelliSeal Bladeshaft Hours

Vibration Reduction

Yes

Drive System Type

Locking differential drive system

Usability

Operational Adjustments

- Dual spring assist raise/lower system
- Maintenance-free belt tensioning
- Self-propelled operation

Blade Mounting Options

Left-side mount, Right-side mount

General Specifications

Cutting Applications

Concrete • Asphalt

Model Identifier

Q-520
