

Concrete and Asphalt Cutting Machine

This construction machinery is designed for cutting concrete and asphalt surfaces. It is powered by a gasoline engine and provides reliable performance on job sites.

Product Overview

Professional Cutting Solution

This robust concrete and asphalt cutting machine is engineered for high-performance construction and road maintenance tasks. Powered by a reliable gasoline engine, it delivers consistent power for demanding job sites. The unit features an integrated water cooling system to suppress dust and maximize blade longevity, while the adjustable cutting depth ensures versatility for various surface requirements.

Technical Specifications

Key Features

- Adjustable cutting depth
- Water cooling system
- Circular saw blade
- Ergonomic controls
- Sturdy frame construction

Power Source

Gasoline Engine

Primary Applications

Concrete Cutting, Asphalt Cutting, Road Maintenance
