

Concrete and Asphalt Cutting Saw

This concrete saw is designed for cutting concrete and asphalt surfaces. It features a rigid frame to ensure flat reduction, resistance to warping, and prolonged blade life.

Product Overview

Professional Cutting Solution

This robust concrete and asphalt cutting saw is engineered for demanding construction environments. Featuring a thickened, diamond-tipped blade, it is perfectly suited for cutting expansion joints, concrete road engineering, and slotting tasks. The machine is designed with user comfort in mind, offering an adjustable handle and crank-operated cutting depth to ensure precision across various materials including marble and granite.

Technical Specifications

Engine Type	Diesel engine
Cutting Depth	270 mm
Blade Diameter Range	400-700mm
Operating Speed	2200 r/min

Key Features

Design Highlights

- Super rigid frame structure for vibration resistance
- Adjustable handle height for ergonomic comfort
- Crank-operated cutting depth adjustment
- Integrated stainless steel water tank for cooling
- Blade life extension technology

Applications

Primary Applications	Highway Cutting, Bridge Construction, Asphalt Pavement, Concrete Pavement, Stone Cutting, Expansion Joints
