

Concrete and Asphalt Joint Cutting Machine

This concrete cutting machine is designed for creating precise cuts in concrete and asphalt surfaces. It utilizes a high-speed circular blade, often diamond-tipped, and a water cooling system for optimal cutting performance.

Overview

Professional Concrete & Asphalt Cutting Solution

This robust and efficient joint-cutting machine is engineered for creating precise cuts in both concrete and asphalt surfaces. Featuring a high-speed diamond-tipped blade and an integrated water cooling system, it ensures clean cuts while minimizing dust and preventing blade overheating. Its adjustable cutting depth and ergonomic design make it an essential tool for road construction, bridge maintenance, and pavement repair projects.

Performance

Cutting Capabilities

1 Variable

Adjustable Depth

Key Features

Cooling System	Integrated water cooling system for dust reduction and blade longevity
Blade Specification	High-speed circular blade, typically diamond-tipped
Safety Equipment	Blade Guards, Emergency Shut-off

Applications

Common Applications

- Expansion joint installation
- Crack control
- Pavement repair
- Road construction
- Bridge maintenance

Design & Build

Portability

Portable • Job-site Ready

Structure	Sturdy frame with ergonomic design for stability and ease of operation
