

Concrete Core Drill Bit

Diamond core bits are designed for drilling concrete, cured concrete, reinforced concrete and other hard materials. These bits are available in various sizes to suit different applications and feature a 1/2" BSP Female thread.

Product Overview

Professional Diamond Core Drill Bits

These high-performance diamond core bits are engineered for precision drilling in demanding construction environments. Designed for compatibility with cured, reinforced, and standard concrete, they offer robust durability for professional applications. With a standardized mounting system and a variety of segment configurations, these bits ensure reliable performance across diverse drilling projects.

Technical Specifications

Thread Size	1/2" BSP Female
Compatible Materials	Concrete, Cured Concrete, Reinforced Concrete, Hard Materials

Performance Data

Available Drill Bit Configurations

Diameter	Segment Width	Segment Size
38mm	3mm	14.7x3.7x8mm
52mm	4mm	14x4x8mm
65mm	4mm	20x4x8mm
117mm	5mm	20x4x8mm
127mm	5mm	20x4x8mm
