

# Concrete Curb Forming Machine

This paver is designed to build high grade water curbs. It delivers excellent yield of perfect curb lines.

## Overview

### Professional Concrete Curb Forming

This specialized concrete curb forming machine is engineered for high-efficiency road construction and landscaping projects. By automating the curb laying process, it ensures consistent uniformity and structural durability while significantly reducing manual labor requirements. Designed for versatility, it offers flexible power options to suit different operational environments.

## Technical Specifications

### Engine Power

**12 H.P.**

Diesel Power

**13 ps**

Gasoline Power

### Engine Options

195 Diesel Engine, GX390 Gasoline Engine

## Logistics

### Production Lead Time

20 days

### Packaging

Nude
