

# Concrete Cutting Diamond Saw Blades

Diamond saw blades are designed for cutting concrete and reinforced concrete. They are suitable for concrete lintels, slabs, pipes, and various reinforced concrete applications.

## Product Overview

### High-Performance Concrete Cutting

These diamond saw blades are engineered specifically for demanding concrete cutting applications. Designed to handle a wide range of materials from cured concrete to reinforced slabs, they offer reliable performance for professional construction projects. Their robust construction ensures durability and efficiency when cutting through wire-reinforced or superhard concrete.

## Applications

### Supported Materials

- Concrete lintel
- Concrete slab
- Concrete pipes
- Wire reinforcing concrete
- Superhard concrete
- Cured concrete

<b>Key Use Cases</b>	Construction, Infrastructure, Reinforced Concrete, Heavy Duty
