

Concrete Floor Saw

The concrete floor saw is a robust machine for cutting concrete, asphalt, and hard surfaces. It features an adjustable cutting depth and a water cooling system.

Product Overview

Professional Concrete Floor Saw

This robust floor saw is engineered for precision cutting on concrete, asphalt, and other hard surfaces. Designed with the operator in mind, it features ergonomic handles and an easy-crank system for effortless depth adjustment. Integrated water cooling and a built-in position guide ensure clean, straight cuts while maximizing blade longevity.

Key Features

Operational Features

- Comfortable grip handles for reduced operator fatigue
- Easy-crank mechanism for precise cutting depth control
- Integrated saw position guide for straight-line accuracy
- Advanced water delivery system for optimal blade cooling and dust suppression

Performance

Suitable Applications

Concrete Cutting, Asphalt Cutting, Road Maintenance, Construction Projects
