

Concrete Floor Saw

The concrete floor saw is a powerful tool for cutting concrete and asphalt surfaces. It features adjustable cutting depth and a water cooling system to minimize dust and extend blade life.

Overview

Professional Concrete Floor Saw

This powerful and versatile floor saw is engineered for demanding job site conditions, specifically designed for cutting concrete, asphalt, and other hard surfaces. It features a robust, reliable engine and an integrated water cooling system that minimizes dust while significantly extending the life of the cutting blade. With adjustable cutting depth and an ergonomic design, this tool ensures precise results, easy maneuverability, and enhanced operator comfort for road construction and repair projects.

Technical Specifications

| | |
|--------------|-----------------|
| Blade Size | 400mm x 25.4mm |
| Power Source | Gasoline Engine |

Features

Usability

- Adjustable cutting depth
- Water cooling system
- Ergonomic handle design
- Easy-roll wheel design

| | |
