

Concrete Floor Saw

The concrete floor saw is a powerful and efficient tool designed for cutting concrete and asphalt surfaces. With adjustable cutting depth and ergonomic controls, this saw provides optimal performance and operator comfort for various construction and demolition applications.

Overview

Professional Concrete Floor Saw

This high-performance concrete floor saw is engineered for precision cutting on concrete and asphalt surfaces. Built with a robust engine and a durable frame, it ensures stability and reliability for demanding construction and demolition tasks. The design prioritizes operator comfort with ergonomic controls and offers adjustable cutting depth for versatile application across various job sites.

Technical Specifications

Blade Diameter	315 mm
Cutting Depth	15 mm

Features

Key Features	Adjustable Cutting Depth, Ergonomic Design, Robust Engine, Heavy-Duty Frame
--------------	---

Applications

Suitable Surfaces

- Concrete
- Asphalt
