

Concrete Mixer

This concrete mixer is designed for consistent mixing of concrete materials. It features robust construction for durability and optimized mixing blades for thorough blending.

Product Overview

Industrial Concrete Mixing Solutions

This high-performance concrete mixer is engineered for efficient and consistent material blending in demanding industrial environments. It features a robust, durable construction equipped with a powerful motor and optimized mixing blades to ensure a thorough mixture of cement, aggregates, and water. The equipment is versatile and suitable for a wide range of applications including construction projects and precast concrete production.

Configuration & Types

Available Mixer Configurations

- Batch concrete mixer
- Continuous concrete mixer
- Gravity type concrete mixer
- Forced action concrete mixer
- Horizontal concrete mixer
- Vertical concrete mixer
- Stationary concrete mixer
- Portable concrete mixer
- Reversal concrete mixer
- Single shaft concrete mixer
- Twin-shaft concrete mixer

Power Source Options

Diesel-engine, Electric
