

Concrete Mixer Mixing Blade for SICOMA Mixers

This mixing blade is designed for SICOMA concrete mixers. It ensures efficient and homogeneous mixing of concrete for optimal results.

Product Overview

High-Performance Concrete Mixer Blades

These professional-grade mixing blades are engineered for superior efficiency and homogeneous mixing performance in industrial concrete production. Utilizing advanced metallurgical processes and rigorous heat treatment techniques, these components offer exceptional wear resistance in demanding environments. They are precision-manufactured to ensure long-lasting durability and consistent output quality for high-capacity mixing operations.

Technical Specifications

Compatible Mixer Models

SICOMA, BHS, KYC, LINTEC, TEKA, LIEBHERR

Manufacturing Standards

Production Technology

- Scientific chemical composition selection
- Precise temperature control technology
- Advanced heat treatment processes
- Specialized melting and refining techniques
- Rigorous quality testing protocols

Available Services

OEM • ODM • Custom Design via Drawing • Sample Replication
