Overview

Versatile Construction Mixing

This portable concrete mixer is engineered to handle a wide range of concrete types, including dry-hard, semi-hard, and plastic mixtures. Designed for high efficiency and outstanding quality, it meets the rigorous demands of various construction projects. Its compact design ensures easy transport, while the integrated lifting mechanism significantly streamlines the loading process on-site.

Technical Specifications

Suitable Materials

- Dry-hard concrete
- Semi-hard concrete
- Plastic concrete
- Mortar

Key Features

Portable • High-efficiency • Lifting Mechanism • Wheeled Chassis

Available Power Options

Gasoline, Diesel, Motor (Electric)

Operational Details

Model Identifier

JZC350

Discharge Method

Tilting mechanism for controlled discharge
