

Concrete Mixer with Steel Frame

This construction machinery is designed for mixing materials such as concrete or mortar on construction sites. The drum is positioned at an angle for efficient mixing.

Overview

Heavy-Duty Construction Mixing Solution

This concrete mixer is engineered for demanding construction environments, featuring a robust steel frame that ensures stability and longevity. The unit is equipped with a high-efficiency electric motor and a specially angled mixing drum designed to handle materials like concrete and mortar with ease. Its durable construction makes it an essential tool for professional site operations.

Technical Specifications

Power Source	Electric
Frame Material	Welded Steel
Suitable Applications	Concrete Mixing, Mortar Mixing, Construction Site

Design Features

Key Design Features

- Angled drum positioning for optimized mixing
- Reinforced steel beam frame
- Industrial-grade electric motor

Color Scheme

Red Drum • Dark Gray Frame • Dark Blue Motor
