

# Concrete Power Trowel

The concrete power trowel creates level, smooth surfaces on large concrete areas, such as floors or patios. It utilizes a rotating blade assembly enclosed by a guard ring, with hand-mounted controls for adjusting blade pitch and engine speed.

## Overview

### Professional Concrete Finishing

The Concrete Power Trowel is an essential machine designed to create level, smooth, and durable surfaces on large concrete areas, such as interior floors or patio slabs. Featuring a robust rotating blade assembly enclosed by a safety guard ring, it offers precise control for operators to adjust blade pitch and engine speed. This equipment is engineered for efficiency and reliability in demanding construction environments.

## Performance Metrics

### Working Speed

**70 rpm**

Min Speed

**130 rpm**

Max Speed

Blade Angle Range

0-15°

Max Engine Output

5.5 HP

## Model Comparison

### Model Specifications

Model	Diameter	Net Weight	Gross Weight
HMR80	80 cm	70	90
HMR100	100 cm	93	123
HMR80/100	80/100 cm	116	146
HMR120V	120 cm	122	152

## Technical Details

Available Models

HMR80, HMR100, HMR80/100, HMR120V
