Product Overview

Professional Concrete Finishing

This walk-behind power trowel is designed to help professional finishers maximize productivity on concrete projects. It features a robust gearbox that provides the high torque required for floating and the high speeds necessary for a perfect finish. With an adjustable design, it is suitable for various concrete mixes and site conditions, ensuring a high-quality, level surface every time.

Technical Specifications

Working Diameter Range	600mm - 1200mm
Engine Model	Honda GX160
Power Source	Gasoline

Features

Key Features

- Adjustable handle for operator comfort
- Protective safety cage
- Precision-engineered rotor and blades
- High-torque gearbox for floating and finishing

Application Suitability	Professional Contractors, Concrete Finishing, Floating, Surface Leveling
