

Concrete Pump Pipe

This high-pressure concrete pump pipe is designed for efficient and reliable concrete conveying. It features a robust construction with a hardened inner layer for enhanced durability and wear resistance.

Product Overview

High-Performance Concrete Pump Pipe

This industrial-grade concrete pump pipe is engineered for heavy-duty construction applications. Featuring an inner-hardened surface treatment, it offers superior wear resistance and durability under high-pressure conditions. Designed for versatility, the pipe supports multiple flange configurations and size requirements to ensure seamless integration into existing pump setups.

Technical Specifications

Supported Flange Types

- Metric
- Heavy-duty (California)
- ZX
- F/M

Available Pipe Sizes

4 inch, 5 inch

Processing Technology

Heat-treated with inner surface hardening

Application

Application Types

Boom Pipe • Deck Pipe
