

Concrete Pump Truck

This heavy-duty concrete pump truck ensures efficient and precise concrete placement. Featuring a multi-section boom and hydraulic outriggers, it's ideal for large-scale construction.

Overview

High-Performance Concrete Pumping Solution

This heavy-duty concrete pump truck is engineered for efficient and precise concrete placement on demanding construction sites. Featuring a multi-section boom, it provides superior reach and maneuverability, allowing operators to deliver concrete to elevated or hard-to-reach areas with ease. Built on a robust chassis with hydraulic outriggers, the unit ensures maximum stability and safety, making it an ideal choice for large-scale projects requiring high-volume output.

Key Features

Operational Capabilities	Multi-section boom, Extended reach, High-capacity pumping, Hydraulic stabilization
--------------------------	--

Technical Specifications

Equipment Type	Concrete Pump Truck
Stability System	Hydraulic outriggers
