

Concrete Pump Truck with Multi-Section Boom

This concrete pump truck is designed for efficient and precise concrete placement on construction sites. Its multi-section boom provides extended reach and maneuverability for accessing challenging locations.

Product Overview

High-Performance Concrete Placement

This heavy-duty concrete pump truck is engineered for efficient and precise concrete placement across diverse construction environments. Featuring a multi-section boom, it offers exceptional reach and maneuverability to access challenging locations on-site. The combination of a robust chassis for stability and an advanced pumping system ensures a consistent, high-performance flow for demanding projects.

Core Capabilities

Boom Configuration	Multi-section boom
Key Features	Extended Reach, High Maneuverability, Chassis Stability, Consistent Flow, User-Friendly Controls

Operational Performance

Performance Highlights

5 Z

Boom Sections

Safety & Reliability

Safety and Reliability

- Integrated safety features for site protection
- Advanced pumping system for reliability
- Robust chassis design for maximum stability
- Engineered for demanding construction environments
