

Concrete Spun Pile Cutting Machine

This machine is designed for efficiently and precisely cutting concrete spun piles. It features a diamond blade, a water cooling system, and a four-axis structure for stability.

Overview

Precision Cutting for Concrete Spun Piles

This specialized machine is engineered for the efficient and precise cutting of concrete spun piles. It features a robust diamond blade mounted on a rotating arm, ensuring clean cuts and high performance. The integrated water cooling system significantly reduces dust emissions during operation while simultaneously extending the service life of the cutting blade. Designed for mobility, the unit is mounted on wheels for easy positioning on job sites.

Technical Specifications

Model Identifier	JL 20120062*03
Cutting Mechanism	Diamond blade
Cooling System	Yes

Features

Portability	Mounted on wheels
-------------	-------------------

Compliance

Certifications	CE, ISO 9001:2000, SGS
----------------	------------------------
