Product Overview

High-Performance Concrete Vibrator Shaft

This flexible shaft concrete vibrator is designed for efficient concrete consolidation in construction projects. It features a durable, flexible shaft encased in a protective rubber hose, allowing for easy maneuverability and access to tight spaces. Engineered for reliability, the unique shaft design significantly reduces noise while enhancing overall power intensity and operational efficiency.

Technical Specifications

Key Features

- High-strength thickened hose construction
- Anti-clogging design
- 40Mn/65Mn steel braided tube
- Japanese type connector
- Heat-treated and electroplated head

Performance Metrics

150 W

Power Rating

Construction Quality

Durability Profile

Low Noise • High Reliability • Heat Treated • Electroplated

Material Composition

40Mn Steel, 65Mn Steel, Reinforced Rubber
