

Concrete Vibratory Screed

This vibratory screed machine is equipped with a gasoline engine for reliable performance and easy starting. It is designed for leveling and compacting wet concrete surfaces, ensuring a strong and durable finish.

Product Overview

Versatile Concrete Construction Solution

This modular concrete vibratory screed is designed for professional ground compaction, leveling, and vibration tamping. Featuring a robust steel structure, it offers highly customizable working widths up to 18 meters to accommodate various construction site requirements. The integrated design ensures superior surface finishing and efficient pulp provision, while modular components allow for easy assembly, disassembly, and lower maintenance costs.

Performance Features

Key Benefits

Modular Design, Steel Construction, Anti-Rust Finish, High-Speed Spindle, Adjustable Arch

Technical Specifications

Model Specifications

Model	Power (HP)	Working Width (m)	Fuel Tank (L)
OKS-55	5.5	4-6.5	3.6
OKS-90	9	7-9	6
OKS-130	13	9-18	6.5

Shared Technical Details

- Air-cooled, 4-stroke, OHV engine
- Working depth: 26cm
- Exciting force: 35cm
- Universal joint adjustable arch: 10-30 degrees
