

Conductor Stranding Machine

This conductor stranding machine is designed for XLPE and armoured cables. It is capable of handling cables up to 630mm payoff drum and includes steel wire armouring and multicore cabling configurations.

Overview

High-Performance Conductor Stranding Solution

This industrial-grade conductor stranding machine is engineered for the precise manufacturing of high-quality cables, including XLPE and armoured types. It is designed to handle cable payoff drums up to 630mm, offering versatility for diverse industrial cable requirements. The system integrates steel wire armouring and multicore cabling configurations to ensure durability and efficiency in cable production.

Technical Specifications

Machine Capabilities

- Conductor Stranding
- Steel Wire Armouring
- Multicore Cabling

Industrial Application

Cable Manufacturing • Industrial Cabling

Maximum Payoff Drum Size

630 mm

Supported Cable Types

XLPE, Armoured Cables, Multicore
