Product Overview

Professional Rotary Drilling Solution

The APF-ZD cone bottom rotary drill is a high-performance tool engineered for demanding rock drilling and piling operations. Featuring a robust, specialized construction with a unique cone-shaped bottom, it provides superior soil penetration and efficient debris removal. This versatile tool is designed to integrate seamlessly with various construction machinery, enhancing productivity and stability on diverse job sites.

Technical Specifications

Structural Features

- APF-ZD picket cone bottom design
- No upper or lower floor construction
- Lower cylinder with opening and closing mechanism

Applicable Formations

Mudstone, Sandstone, Pebble layer, Medium hard rock, Clay layer

Customization

Yes
