

# Cone Crusher Bowl Liner and Mantle for Symons 7FT

Bowl liners and mantles are essential components for Symons 7FT cone crushers. These parts provide durable wear surfaces to withstand the abrasive forces of material reduction.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Wear Solutions

These bowl liners and mantles are engineered specifically for 7FT cone crushers, providing superior durability in demanding mining and aggregate processing environments. Manufactured using high-manganese casting processes, these components ensure optimal crushing efficiency and extended service life. Each part is precision-engineered to meet rigorous quality standards, minimizing downtime and maintenance costs for heavy-duty crushing operations.

## Technical Specifications

Primary wear components including bowl liners and mantles for heavy-duty crushing.

Precision-engineered wear-resistant casting components.

<b>Material Composition</b>	High Manganese Casting
<b>Compatible Equipment</b>	Cone Crusher, 7FT Symons Type
<b>Annual Production Capacity</b>	30000 tons

## Compliance & Quality

### Quality Certifications

ISO Certified • CE Compliant

### Warranty Coverage

12-month replacement or compensation for operational defects

## Logistics

### Estimated Global Delivery

**30 days**

Sea Freight Time
