High-Performance Clamping Set

This clamping set is engineered for cone crushers, providing secure operation and essential support for crushing efficiency. Designed for durability in demanding mining environments, it ensures reliable performance and longevity. It serves as a critical component for maintaining optimal crusher function, backed by rigorous quality standards.

Compatibility

Compatible Crusher Models

- GP100
- GP200
- GP300
- GP500
- GP550
- GP100S
- GP200S
- GP300S
- GP500S
- GP11F
- GP220

Technical Specifications

High-durability clamping components designed for secure crusher operation.

Annual Production Capacity

30000 tons
Annual Output

Certifications

ISO Certified

Minimum Order Quantity

1 PC

Logistics

Packing Method

Iron Pallet with Air Bubble Film

Shipping Lead Time

1-2 days to major ports
