

Cone Crusher Main Shaft Assembly for GP300S

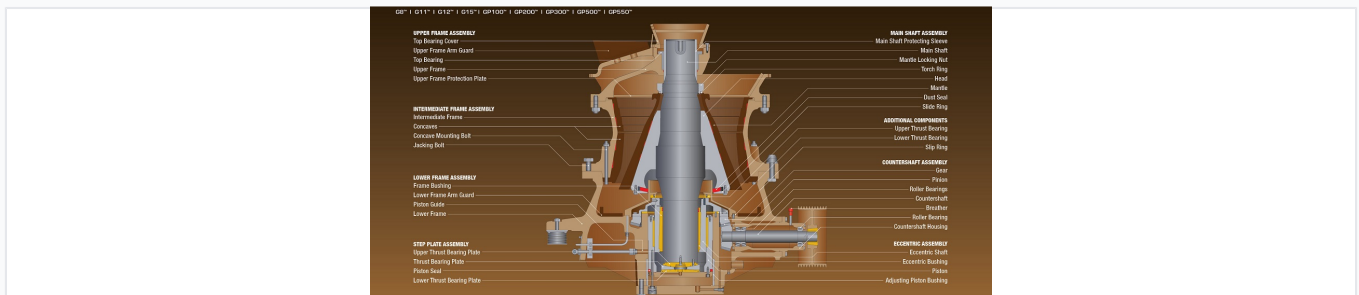

This main shaft assembly is designed for Nordberg GP300S cone crushers. It is manufactured with durable materials to ensure optimal performance and longevity in demanding mining applications.

Product Overview

Detailed sectional view showing the main shaft assembly and its integration with the upper, intermediate, and lower frame components.

High-Performance Main Shaft Assembly

This main shaft assembly is specifically engineered for GP300S cone crushers, ensuring seamless compatibility and reliable power transmission. Manufactured with high wear-resistance features and original technical standards, it is designed to withstand the high-stress environments of mining and aggregate processing. The assembly provides a critical lubrication track and works in tandem with the main frame and eccentric sleeve to maintain optimal crushing functionality.

Technical Specifications

High-precision main shaft assembly designed for heavy-duty crushing operations.

Compatible Crusher Models	GP100, GP200, GP300, GP500, GP550, GP100S, GP200S, GP300S, GP500S, GP11F, GP220
Functional Role	Provides lubrication track and rotates within the eccentric sleeve to drive the crushing head.

Manufacturing & Quality

Quality Certifications

ISO Certified • QC Guaranteed

Inspection & Support

- Video inspection available
- Non-destructive testing
- 24-hour online after-sale service
- 12-month warranty against hidden defects

Annual Production Capacity	30000 tons
-----------------------------------	------------

Supply Chain & Logistics

Supply Metrics

1 PC

Minimum Order (MOQ)

20 Years

Industry Experience

Shipping & Lead Times

Destination Port	Transit Time from Factory
Shanghai Port	1 Day
Ningbo/Guangzhou Port	2 Days

Packaging Standard	Iron Pallet with Air Bubble Film
---------------------------	----------------------------------

Component Breakdown

Available Spare Parts	Main Frame, Adjustment Ring, Head Assy, Bowl, Drive Gear, Counterweight, Bronze Bushing, Tramp Release Cylinder, Protection Bushing, Mantle, Torch Ring
