

# Connectable T5 LED Tube Light

This connectable T5 LED tube light is designed for various lighting applications. Its energy-efficient LED technology provides bright and uniform illumination.

## ADDITIONAL IMAGES

## Product Overview

### Versatile T5 LED Lighting Solution

This connectable T5 LED tube light is designed for efficient, uniform illumination across a variety of professional and residential settings. Featuring a high-transmittance PC cover with anti-glare coating, it provides soft, eye-friendly light while maintaining low power consumption and thermal output. Its modular design allows for seamless series connection, making it an ideal, environmentally friendly replacement for traditional fluorescent tubes.

## Key Features

### Core Benefits

- Connectable design for series installation
- High-transmittance PC cover
- Anti-glare and eye-protection coating
- Constant current and voltage technology
- Flicker-free operation
- Low thermal output

## Applications

### Suitable Environments

Office, Hospital, School, Shopping Mall, Living Room, Workshop

## Technical Specifications

### Certifications & Compliance

Energy Efficient • Environment-Friendly

### Form Factor

T5
