

Connecting Rod Bearing Set for Vehicle Engines

Set of connecting rod bearings designed for heavy-duty vehicle engines. These bearings are manufactured to meet or exceed OEM specifications, ensuring proper fit and function within the engine.

Product Overview

High-Performance Connecting Rod Bearing Set

This connecting rod bearing set is engineered for heavy-duty vehicle engines, providing a reliable solution for engine overhauls. The set includes both upper and lower bearing components, manufactured to meet or exceed original equipment standards for precise fitment and durability. Designed to withstand the demanding conditions of internal combustion engines, these components ensure optimal performance and longevity for your vehicle's engine assembly.

Technical Specifications

Included Components

Component	Part Number
Lower Bearing	VG1560030033
Upper Bearing	VG1560030034

Total Pieces per Set	12
Reference Number	0E011

Compatibility & Application

Application	Heavy-duty Engines, Internal Combustion Engines, Connecting Rod Assembly
