Product Overview

Advanced Console Air Purifier

This console air purifier utilizes a comprehensive multi-stage filtration system to ensure a healthier indoor environment. By combining pre-filter, HEPA, activated carbon, UV, PCO, and optional ion technologies, it effectively captures allergens, smoke, bacteria, and volatile organic compounds. Designed for convenience, it features intelligent air quality monitoring and automatic fan speed adjustment.

Filtration System

Target Pollutants

- Allergens
- Pollen
- Dust
- Smoke
- Pet Dander
- Bacteria
- Viruses
- Toxic Fumes
- Foul Odors

Filtration Stages

Pre-filter, HEPA Filter, Carbon Filter, UV Lamp, PCO, Ion (Optional)
