

Constant Pressure Water Supply System with Auto-Speed Control

This water supply system maintains constant pressure and automatically adjusts speed for efficient water distribution. It is suitable for applications requiring consistent water pressure.

Overview

Intelligent Constant Pressure Water Supply

This automatic water supply system is engineered to provide consistent and reliable water pressure for demanding applications. By integrating an advanced water pump with an intelligent auto-speed controller and a pre-pressurized tank, the system ensures efficient operation and seamless performance. The design includes a non-toxic rubber membrane and user-friendly controls, making it a convenient solution for professional fluid management.

Technical Specifications

Core Components

- Water Pump
- Airtight Pressure Switch
- Pressure Tank with Non-toxic Membrane
- Pressure Gauge
- Flexible Connecting Pipe
- Intelligent Controller
- Integrated Auto-Speed Driver

Factory Pre-fill Pressure

0.12 MPa

Compliance & Quality

Quality Standards

100% Quality Reliable • Certified Standards
