

Constant Velocity Joint for Automotive Transmissions

This constant velocity joint is designed for automotive transmission systems. It facilitates the transfer of power from the transmission to the wheels at a constant speed, regardless of suspension articulation.

Product Overview

High-Performance CV Joint

This constant velocity (CV) joint is engineered for automotive transmission systems, facilitating smooth power transfer from the transmission to the wheels. Designed for durability and reliability, it accommodates suspension movement and steering angles to ensure consistent vehicle performance. Manufactured to meet rigorous standards, it features precision-engineered components, including a robust housing and high-quality internal bearings, to minimize noise and vibration.

Technical Specifications

OEM Reference Numbers

- 171407311L
- 3054073111

Material

Steel

Compatible Vehicle Brands

Audi, VW, Ford
