

Construction Machinery Filter

This high-efficiency filtration solution is designed for construction machinery. It effectively removes contaminants, ensuring optimal performance and longevity of equipment.

Product Overview

High-Efficiency Filtration Solution

This construction machinery filter is designed to provide comprehensive protection for heavy equipment. It serves as a vital component for diesel, oil, air, and hydraulic systems, effectively removing contaminants to ensure optimal operational performance. Built with durable materials, it offers reliable defense against dust and debris while facilitating easy installation and maintenance.

Technical Specifications

Compatible Filter Systems	Diesel Filter, Oil Filter, Air Filter, Hydraulic Oil Filter
Application	Construction Machinery
