

Construction Machinery Scarifier Blades

High-performance scarifier blades designed for construction machinery. These wear-resistant attachments are engineered for efficient material removal and surface preparation.

Product Overview

High-Performance Scarifier Blades

These heavy-duty scarifier blades are precision-engineered for efficient material removal and surface preparation in demanding construction environments. Crafted from high-strength alloy steel, they offer exceptional durability and resistance to impact, ensuring a consistent scarification depth and pattern. Designed for professional use, these blades provide extended wear life for applications including road maintenance, asphalt milling, and concrete demolition.

Technical Specifications

Key Performance Indicators

1 High

Wear Resistance

1 High

Impact Resistance

Material Composition

High-strength alloy steel

Primary Applications

Road Maintenance, Asphalt Milling, Concrete Demolition, Surface Preparation

Compatibility

Compatible Equipment Types

- Rotary drilling rigs
- Skid steer augers
- Piling rigs
- Trenchers
- Wall cutters
