

Contactless Infrared Water Dispenser

This water dispenser uses infrared sensors for contactless operation, promoting hygiene. It offers both manual and sensor modes and can accommodate a 16L cabinet, fridge, bottom loading, or RO water filter.

ADDITIONAL IMAGES

Overview

Modern contactless design featuring infrared sensor technology for improved hygiene.

Versatile dispensing options including hot, cold, and room temperature water.

Hygiene-Focused Hydration

This advanced water dispenser utilizes contactless infrared sensing technology to provide a hygienic and hands-free hydration experience, ideal for modern offices and homes. It features dual operation modes, allowing for both manual and sensor-based dispensing. Designed for convenience, the unit supports bottom-loading for easy bottle replacement and includes a built-in cabinet for storage.
