

Containerized Bitumen Storage Tank

This containerized bitumen tank is designed for efficient storage and transportation. It boasts excellent insulation performance and strong versatility.

ADDITIONAL IMAGES

Product Overview

Efficient Bitumen Storage and Transportation

This containerized bitumen tank is a specialized solution designed for the safe and efficient storage and transport of bitumen. Built within a standard ISO-compliant shipping container frame, it allows for seamless logistics via truck, train, or ship. The unit features robust insulation to maintain optimal temperatures, preventing solidification and degradation, while its corrosion-resistant construction ensures long-term reliability in demanding road construction and asphalt projects.

Technical Specifications

Capacity

20 m3

20GP Capacity

40 m3

40HQ Capacity

Construction Materials

- Carbon steel or stainless steel tank
- Corrosion-resistant coating
- ISO-compliant shipping container frame

Available Models

20GP, 40HQ

Key Features

Product Highlights

Containerized design • High transport efficiency • Low cost • Strong versatility • High safety • Excellent insulation

Operational Capabilities

System Capabilities

- Integrated heating system
- Insulation for temperature maintenance
- Loading and unloading systems
- Pressure relief valves
- Level indicators
- Flanged connections for circulation

Applications

Primary Applications

Road construction, Asphalt mixing plants, Pavement maintenance, Asphalt projects
