

Continuous Band Sealer

This continuous band sealer is designed for sealing thermoplastic materials. It features adjustable conveyor speed and sealing temperature to accommodate various bag thicknesses and materials.

Overview

Continuous Band Sealer

This continuous band sealer is engineered for high-efficiency packaging of thermoplastic materials. Designed for seamless integration into production lines, it offers precise control over conveyor speed and sealing temperature. This flexibility ensures reliable, consistent seals across a wide variety of bag thicknesses and material types.

Technical Specifications

Key Operational Features

- Adjustable conveyor speed
- Variable sealing temperature control
- Compatible with various bag thicknesses

Application

Thermoplastic Sealing, Continuous Production
