

# Continuous Belt Sander for Wood Plastic Metal

This belt sander is a power tool used for sanding wood, plastic, or metal. It utilizes a continuous loop of abrasive sandpaper that rotates at high speed to provide efficient material removal and a smooth finish.

## Overview

### Professional Grade Belt Sander

This continuous belt sander is a versatile power tool engineered for efficient material removal on wood, plastic, and metal surfaces. Designed for heavy-duty sanding tasks, it features a robust motor housing with integrated ventilation to prevent overheating during extended use. The ergonomic design includes dual handles for superior stability and control, making it suitable for both professional workshops and demanding DIY projects.

## Technical Specifications

### Key Design Features

- Continuous loop abrasive system
- Front handle for stability
- Rear handle for precision control
- Adjustable belt tension knob
- Adjustable belt tracking knob
- Integrated ventilation slots

### Compatible Materials

Wood, Plastic, Metal

## Performance

### Application Suitability

Heavy-duty • Professional • DIY
