

Continuous Blade Band Saw for Wood and Metal

This band saw is a versatile cutting tool designed for both straight and curved cuts in wood, metal, and other materials. It features a continuous blade that moves in one direction, providing smooth and precise cuts.

Product Overview

Versatile Cutting Performance

This continuous blade band saw is engineered for precision cutting in both wood and metal applications. Designed with a sturdy frame and an adjustable work table, it allows for both straight and complex curved cuts with ease. It features a reliable blade guide system and essential safety components, making it a dependable choice for woodworking and metalworking workshops.

Technical Specifications
