

Continuous Bright Annealing Line for Metal Strips and Wires

This continuous bright annealing line is designed for annealing metal strips or wires. It features precise temperature control and a cooling section to ensure uniform annealing and prevent oxidation.

ADDITIONAL IMAGES

Overview

Continuous Bright Annealing Line

This continuous bright annealing line is engineered for the high-efficiency processing of stainless steel strips and wires. Designed to operate in a controlled atmosphere, it ensures uniform annealing and prevents oxidation, resulting in consistent, high-quality output. The system features advanced heating capabilities and robust material handling, making it an ideal solution for high-throughput industrial metal processing requirements.

Technical Specifications

Annual Capacity

60000 tons/year

Max Production Capacity

Material Dimensions

Type	Thickness (mm)	Width (mm)
Fine thin-gauge plate	0.1 - 0.5	300 - 660
Standard gauge plate	0.25 - 2.0	600 - 1250

Compatible Materials

200 Series Stainless Steel, 300 Series Stainless Steel, 400 Series Stainless Steel

Operational Parameters

Coil Specifications

- Coil ID: 610 mm
- Coil OD: 800 - 2100 mm
- Max Coil Weight: 25 Tons

Heating Methods

Electrical Heating • Gas Heating

Key Line Features

- Furnace input and output with roll type seal
- Muffle constructed from imported 601 material for extended service life
- Controlled atmosphere processing
- Integrated material handling system with rollers and guides
