

Continuous Casting Mold

This continuous casting mold is designed for shaping molten metal in continuous casting processes. It supports metal production with dimensions of 900-2250 mm width and 230-250 mm thickness.

Product Overview

Continuous Casting Mold

This continuous casting mold is designed for high-performance metallurgical applications. Engineered for precision and durability, it supports a wide range of casting dimensions to meet demanding industrial requirements. Its robust construction ensures consistent performance in continuous casting equipment setups.

Technical Specifications

Width Range

900 mm
Minimum Width

2250 mm
Maximum Width

Thickness Range

230 mm
Minimum Thickness

250 mm
Maximum Thickness

Classification

Category

Metallurgical Equipment, Continuous Casting Equipment

Quality Assurance

Dimensional Verification

High-precision dimensional verification performed using Coordinate Measuring Machine (CMM) technology.
