

Continuous Rim Ceramic Saw Blade

This blade is used for cutting glazed, rustic, and polished crystal tile. It offers high sharpness, creates flat cutting slots, prevents chipping, and ensures long-lasting performance, making it suitable for various high-level ceramic materials.

Product Overview

Continuous Rim Ceramic Saw Blade

This high-performance continuous rim diamond saw blade is engineered for precision cutting of brittle materials including glazed, rustic, and polished crystal tiles. Designed for smooth, chip-free performance, it minimizes vibration during operation to ensure high-quality edges. It is an ideal choice for professional applications requiring clean cuts on porcelain, vitrified, and wall tiles.

Technical Specifications

Outer Diameter	305 mm
Bore Diameter	60 mm
Rim Thickness	2.2 mm
Diamond Grit Size	10

Application & Compatibility

Compatible Machine Types

- Manual cutting machines
- Single-head automatic machines
- Multi-head automatic machines

Compatible Materials

Glazed Tile, Rustic Tile, Polished Crystal Tile, Porcelain Tile, Vitrified Tile, Floor Tile, Wall Tile

Safety & Usage

Safety Instructions

- Wear ANSI-compliant eye protection
- Never operate without proper working guard
- Inspect for breakage, cracks, or loose tips before use
- Do not use on metal
- Do not exceed maximum blade RPM
