

Continuous Rim Diamond Saw Blade

This diamond blade is precision-engineered for cutting glass and ceramic. Its continuous rim ensures smooth, chip-free cuts on angle grinders and tile saws.

Product Overview

Professional Diamond Saw Blades

This range of high-performance diamond saw blades is engineered for precision cutting across diverse construction materials. Featuring advanced sintering, laser welding, and brazing technologies, these blades ensure clean, chip-free cuts and extended tool life. Optimized for both wet and dry applications, they provide consistent performance in professional environments, including glass, ceramic, concrete, and asphalt cutting tasks.

Technical Specifications

Available Variants

- Sintered continuous rim glass blades
- Sintered continuous rim ceramic blades
- Brazed wall saw blades
- Laser hard brick blades
- Laser green concrete blade
- Laser asphalt blades
- Brazed cured concrete blades
- Laser cured concrete blades

Manufacturing Technologies

Sintered • Brazed • Laser-welded • Continuous Rim

Suitable Materials

Glass, Ceramic, Hard Brick, Green Concrete, Cured Concrete, Asphalt
