

Continuous Rim Diamond Saw Blade for Tile and Stone

This diamond blade features an advanced high-density bond and high diamond concentration. It is suitable for cutting tile, masonry, stone, granite, and marble.

Product Overview

High-Performance Cutting Solution

This continuous rim diamond saw blade is engineered for precision and durability in demanding tile and stone applications. Featuring a high-density bond and high diamond concentration, it ensures a smooth, chip-free cutting experience across various masonry materials. The high-strength center design promotes long service life and reliability for professional users.

Technical Specifications

Dimensions

180 mm Diameter	2.2 mm Thickness	6 mm Segment Height	22.2 mm Arbor Size
