

Continuous Slot Screen Steel Tube

Continuous slot screen steel tubes offer superior filtration and separation capabilities. The robust steel construction ensures durability and resistance to corrosion, making them suitable for demanding industrial applications.

Product Overview

Continuous Slot Wedge Wire Screen

This continuous slot wedge wire screen is a high-performance filtration solution designed for water, oil, and gas well completions. Engineered with a robust V-shaped wire welded to support rods, it offers a high open area and precise slot dimensions for superior fluid flow and particle retention. The construction provides excellent heat resistance, anti-corrosive properties, and long-term reliability in demanding industrial environments.

Physical Dimensions

Diameter Range	25 mm
Maximum Diameter	1200 mm
Maximum Length	6 m

Material & Quality

Certifications

ISO 9001:2000 • CE • SGS

Material Options

Galvanized Low Carbon (LCG), Stainless Steel 304, Stainless Steel 316

Technical Specifications

Available Slot Sizes

- 0.1
- 0.15
- 0.2
- 0.25
- 0.3
- 6

Wedge Wire Dimensions

Dimension Type	Range (mm)
Width	1.50 - 3.70
Height	2.20 - 7.00

Support Rod Dimensions

Dimension Type	Range (mm)
Width	2.30 - 3.70
Height	2.70 - 6.30
Round Wire	2.50 - 6.00
