

Continuous Tunnel Freezer

This industrial tunnel freezer is designed for the continuous freezing of products. Its stainless steel construction ensures hygiene and durability, while the efficient cooling system provides rapid and uniform freezing.

Product Overview

Continuous Industrial Freezing Solution

This continuous tunnel freezer is designed to rapidly process and preserve large volumes of food products, including poultry and fresh produce. Featuring specialized energy-saving technology, the system ensures uniform temperature distribution for consistent quality. Its robust stainless steel construction meets high standards for hygiene and long-term durability in industrial environments.

Technical Features

Energy Efficiency

Patented energy-saving technology

Suitable for	Chicken, Fruit, Industrial Food Processing
Build Material	Stainless Steel
Operation	Continuous
