

## Control Arm Bushing for KIA VENGA

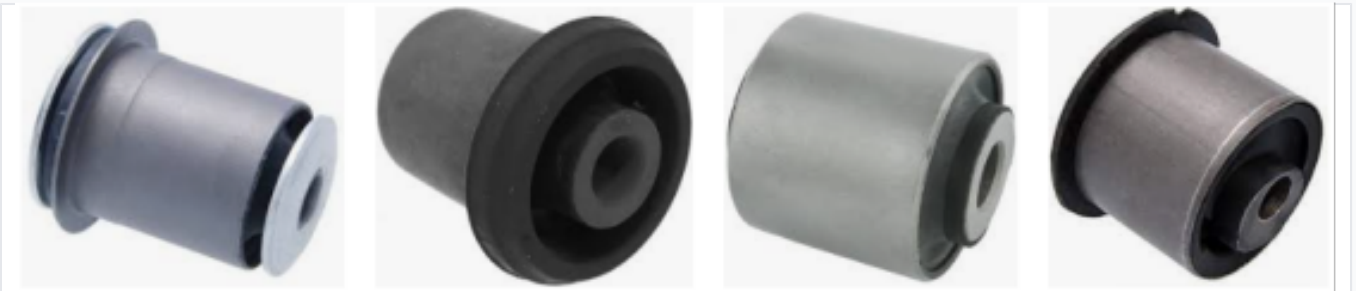

This control arm bushing is made from high-quality steel and natural rubber. It supports in-situ installation with accurately located installation holes and reduces deviation.

### ADDITIONAL IMAGES

### Overview

Essential for maintaining proper alignment and reducing metal-on-metal contact.

### Premium Suspension Control Arm Bushing

This high-quality control arm bushing is specifically engineered for the KIA VENGA to ensure optimal suspension function and reduced noise, vibration, and harshness (NVH). Constructed from refined steel and natural rubber, it provides a secure connection between the control arm and the vehicle chassis, maintaining precise alignment and stability. Designed for direct replacement, it restores ride comfort and handling performance while offering excellent resistance to wear and environmental factors.

### Key Performance Metrics

#### Performance Highlights

**12 Months**

Warranty

**0.001 um**

Glue Fineness

**500 pcs**

Minimum Order

## Technical Specifications

Engineered for a precise fit and reduced NVH (Noise, Vibration, and Harshness).

### Manufacturing Process

- One-piece casting
- Multi-point glue injection process
- Precision-located installation holes
- Uniform metal thickness

### Material Composition

Refined Steel, Natural Rubber, Anti-corrosion Coating

### Fitment Type

Direct Replacement / In-situ Installation

## Benefits

Constructed from premium materials to restore vehicle stability and ride comfort.

### Core Advantages

Resolves Jitters • Improves Comfort • Enhances Stability • Long Life Span • Wear Resistant

## Logistics & Trade

### Trade Information

Category	Details
Trade Terms	EXW, FOB, CIF
Payment Methods	TT, LC, Paypal, Alipay
Delivery Time	45-60 days
Packaging	Neutral Packing (Plastic Bag + Carton Box)
Origin	China

## Quality Standards

### Compliance & Quality

ISO Certified, IATF 16949:2016
