

Control Circuit Board for Garment/Shoe Machinery

This control circuit board is designed for garment, shoe, and accessory manufacturing machinery. It features numerous electronic components for specific machine integration.

Product Overview

Precision Control Circuit Board

This specialized control circuit board is engineered for integration into garment and shoe manufacturing machinery. Featuring a robust design with high-quality electronic components, it ensures reliable operation for industrial sewing and assembly processes. The board is designed for seamless installation, featuring standard mounting points and clear identification codes for maintenance and replacement.

Technical Specifications

Design Features

- Multiple mounting holes
- Circular cutouts for integration
- Integrated circuitry
- High-density component layout

Model Identifier	ZF167418
Board Version/Code	ZWB 3-2005-03
Primary Application	Garment Machinery, Shoe Machinery, Industrial Control
Component Type	Needle Position Board (™)
