

Convex Box Wrench

This single box convex wrench is designed for specialized fastening applications. The closed-end box design with a convex profile provides a secure grip and prevents slippage.

Product Overview

Professional Convex Box Wrench

This convex box wrench is engineered for specialized fastening applications in industrial and mechanical environments. Its unique closed-end box design combined with a convex profile ensures a superior, secure grip on fasteners to prevent slippage during operation. Built for durability and precision, this tool provides the reliability needed for high-torque tasks and restricted access areas.

Technical Specifications

Wrench Type	Convex Box Wrench
Design Features	Closed-end box, Convex profile, Anti-slip

Application

Ideal Environments

- Mechanical assembly
- Industrial maintenance
- Specialized fastening
