Overview

High-Efficiency Conveyor Dishwasher

This automatic commercial dishwasher is engineered for high-volume environments such as restaurants and hotels. Featuring a robust stainless steel construction, it utilizes a continuous conveyor system to streamline washing, rinsing, and drying stages. Designed for professional kitchens, it balances high throughput with energy-efficient operation to reduce utility costs while maintaining strict hygiene standards.

Dimensions & Capacity

Dimensions	5690 x 920 x 1900 mm
Processing Capacity	3500 items/H

Power & Electrical

Total Power Consumption

68.48 kw

Total Power

Power Component Breakdown

Component	Power
Rinse Pump	0.37 kw
Frequency Conversion Heating	8.5 kw x 3
Transmission Motor	0.75 kw
Drying Heating	28.8 kw
Drying Fan	2.2 kw x 2
Booster Pump	0.16 kw
Constant Temperature	7 kw

Voltage

380V

Features

Key Features

Stainless Steel Construction, Automatic Conveyor System, Continuous Drying, Adjustable Wash Parameters, Water Filtration System
